Appln. No. 10/796,009 Amd. dated December 9, 2005 Reply to Office Action of September 16, 2005

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1-3. (Canceled)

4. (Currently amended) A sequence circuit display method for an injection molding machine having contacts and coils for controlling operation of the molding machine, said method comprising selectively inputting a name of a step in the operation of the molding machine from an input device; displaying a sequence circuit of the injection molding machine as a ladder diagram on a display device; and selectively inputting one of the contacts and coils in said ladder diagram, the displayed sequence circuit including contacts and coils corresponding to the selectively inputted one of the contacts and coils as the ladder diagram on the display device, wherein said display of contacts and coils of said ladder diagram in said display device comprises:

preparingselectively displaying one of:

an active display screen for displaying connection states of said contacts and coils along with operations of the injection molding machine in real time and

a still display screen displaying the connection states of said contacts and coils at a certain point of time in operation of the injection molding machine; and selectively displaying one of the prepared screens.

5-6. (Canceled)

Appln. No. 10/796,009 Amd. dated December 9, 2005 Reply to Office Action of September 16, 2005

7. (Currently amended) A sequence circuit display method for an injection molding machine having contacts and coils for controlling operation of the molding machine, said method comprising displaying a sequence circuit of the injection molding machine as a ladder diagram on a display device and selectively inputting one of the contacts and coils in said ladder diagram to thereby display a sequence circuit including contacts and coils corresponding to the selectively inputted one of the contacts and coils as the ladder diagram on the display device, wherein said display of contacts and coils of said ladder diagram in said display device comprises: preparing selectively displaying one of:

an active display screen for displaying connection states of said contacts and coils along with operations of the injection molding machine in real time and

a still display screen displaying the connection states of said contacts and coils at a certain point of time in operation of the injection molding machine; and selectively displaying one of the prepared screens.

8. (Canceled)
